

Classification of living organisms

Key definitions – Activity

Match each word with the correct definition.

Draw a line between each word on the left and the corresponding definition on the right.

Organism

•

•

The process of grouping things together based on shared features.

Microscope

•

•

Any form of life, including animals, plants, fungi and microorganisms.

Plant

•

•

A very small organism that cannot be seen with the naked eye. These tiny organisms are about a million times smaller than us!

**Microorganism
(or Microbe)**

•

•

An organism that can make its own food using sunlight but cannot move around.

Mushroom

•

•

A device that makes small objects look larger. It is similar to a magnifying glass, but a lot more powerful.

Classification

•

•

An organism that can move around and feed on other living things.

Animal

•

•

A form of fungus that looks like a small umbrella. Fungus is a family of organisms, different from animals and plants.
